Japanese Medical Group tours Beacon operations

SIDNEY, BC – Beacon Community Services was today honoured to host representatives of the Shinsei-kai Medical Group from the Saitama prefecture, just north of Tokyo, Japan.

The visitors travelled to Vancouver Island specifically to meet with Beacon CEO Bob Boulter and Beacon's SHOAL Centre staff in order to learn more about Beacon Community Services' operations, particularly in the areas of volunteer services, seniors' recreation, and Assisted Living and Dementia Care models.

Shinsei-kai Medical Group is a private healthcare corporation which operates a hospital, a clinic, seniors' day care centres, home nursing stations, and a training and rehabilitation centre in Japan. Company officials visited Canada as part of an educational tour while exploring ways to enhance service delivery at their operations in Japan.
