### Data constraints

Beacon's overall hourly pay results show that average hourly wages for women and men are equal, while women's median hourly wages are 3% lower than men's. The larger difference in overtime pay reflects differences in the amount of overtime worked during the reporting period. Women worked fewer overtime hours on both an average and median basis. Overtime availability and hours worked may vary across programs, positions, and operational requirements. Beacon will continue to review its compensation and overtime data to better understand the factors contributing to these results.

**Explanatory notes**

7. "Mean bonus pay" refers to bonus pay when averaged for each group.
8. "Median bonus pay" refers to the middle point of bonus pay for each group.
9. "Pay quartile" refers to the percentage of each gender within four equal sized groups based on their hourly pay.

* In accordance with the Pay Transparency Act and reporting rules designed to protect the anonymity and privacy of respondents, one or more gender categories has been excluded due to insufficient numbers to meet disclosure requirements.
